

Faith Ozer Green, MPH
Faithgreen0926@gmail.com - Anchorage, Alaska

EDUCATION

University of Michigan School of Public Health	Ann Arbor, Michigan
<i>Masters of Public Health – Health Behavior and Health Education</i>	
Trinity University	San Antonio, Texas
<i>Bachelor of Arts - Global Health and Medical Anthropology</i>	

EXPERIENCE

Research Professional III – Institute for Social and Economic Research	Anchorage, Alaska
University of Alaska, Anchorage	October 2021-Present

- Manage projects across a variety of disciplines focusing on providing health care services to underserved rural and indigenous populations, including state funded violence and maternal mortality prevention projects with an emphasis on trauma-informed care.
- Actively evaluate and provide feedback for Cook Inlet Tribal Council and associated assistance and rehabilitation programs based on client feedback. Includes facilitating focus groups with recovering individuals or their victim services.
- Maintain communication with community partners across the United States and in Alaska, including facilitating biweekly meetings, organizing project documents, developing new objectives and incorporating data into the quality improvement process.
- Effectively communicate with other project staff and faculty to maintain budget documents, timeline goals and evaluation reports in a timely manner.
- Facilitate and co-author multiple manuscripts and presentations focusing on trauma-informed care for nurses, providers, and support staff and the dissemination of on the ground training
- Develop resources and mentor research assistants, including providing training for data collection and analysis and study design, overseeing project assignments and day-to-day supervision.

Health Informaticist II – Section of Public Health Nursing	Anchorage, Alaska
Alaska Department of Health and Social Services	January 2021-October 2021

- Maintain partnerships with Alaska Native Tribal Health Consortium and South Central Foundation in the dissemination of COVID-19 vaccines and other prevention materials.
- Organize and evaluate incoming state COVID-19 and contact trace data from the existing public health nursing workforce and presented to state COVID Taskforce
- Worked alongside public health nurses in the development and maintenance of vaccine supply and dissemination on the clinical level across public health regions in Alaska
- Evaluated existing and past public outreach clinics that focused on relative local diseases and preventative behaviors as well as assisted with the planning and set-up of COVID-19 related events
- Created educational modules based off of newly developed CDC protocols for the use of monoclonal antibody treatment. Tailored training to both nursing and support staff and coordinated the rollout across the state.

Quarantine Public Health Officer – Anchorage Quarantine Station	Anchorage, Alaska
Centers for Disease Control and Prevention	June 2020-January 2021

- Trained staff station wide in both officer and contractor capacities and reassessed the training protocol for full-time staff, creating a more comprehensive and user-friendly training plan

- Managed supply inventory for PPE, medications for diseases of public health concern and medical supplies. Coordinated emergency drug deliveries for Anchorage, Honolulu and Seattle stations.
- Established and maintained relationships between the station and its federal and local partners, such as the health department, municipality and U.S. customs and border patrol, specifically working with public health nurses to complete complicated or remote contact traces
- Ensured that all staff trainings, certifications and badging were maintained
- Collaborates with health department and agencies along all ports of entry (maritime, land, and air) during emergency situations with travelers attempting to cross while infectious
- Completed certification for emergency response training in the case of natural and man-made emergencies through a variety of CDC training modules.
- Oversaw, coordinated and prepared 2020 Emergency Response Plans with maritime and land border problems, including lessons-learned and quality improvement strategies from COVID-19.

Research Associate for Department of Women's Health

Austin, Texas

University of Texas Dell Medical School

July 2019 – May 2020

- Study coordinator for interdisciplinary research aimed at developing digital phenotype for pregnancy and pregnancy outcomes, including leading recruitment effort for 1,000 participants and charged with consenting and enrolling these individuals at remote clinical sites
- Manage and assist with multiple studies' IRB submissions, protocols, and study tools, such as in the creation of surveys. Worked with compliance officers to ensure all submissions met ethical research standards and were of institutional quality.
- Aid in the development and implementation of new research proposals from development, grant application and mixed-method study design
- Efficiently and effectively organized research materials for multiple studies, including the transfer and shipment of biospecimens, notifying participants of results, and maintaining supplies at multiple clinical sites. Train study staff on informed consent and recruitment protocols, and ensure that all staff and physicians maintain proper up-to-date certifications, site approvals and database permissions. Properly code, store, and maintain participant protected health information
- Maintained longitudinal multi-site studies and relationships between funding and experimenting institutions and clinical sites, working with hospital administrators, physicians and legal reps to navigate patient portals and the electronic medical records for data.
- Staff reassignment to epidemiology lead over a team of contract tracers for the duration of COVID-19 pandemic at medical school

Maternal Child Health Epidemiology Research Specialist V

Austin, Texas

Department of State Health Services

December 2018 – Present

- Analyze quantitative and qualitative data from state-wide maternal child health programming, such as for TexasAIM which is part of a national initiative to reduce maternal mortality
- Developed and executed program evaluation tools, including designing and distributing surveys, cleaning response data, and utilizing user feedback to adjust state programming
- Write and design reports for internal and external audiences, adjusting language and graphic representation accordingly
- Worked within state legislation guidelines to plan and execute a state-wide needs assessment, including training staff in qualitative data collection and analysis, planning travel, and facilitating focus groups for a variety of health care providers across Texas. Focus groups were explicitly aimed at gathering information to inform higher quality healthcare practice.
- Lead in the communication of complex statistical data to be utilized in upper-level presentations for the Texas Legislative session

Graduate Student Instructor

Ann Arbor, Michigan

Frank Anderson

May – December 2017

University of Michigan, Department of Obstetrics and Gynecology

- Orchestrated a diverse set of professional guest lecturers for the course, including invitation, scheduling, and ensuring their materials were available for students in a timely manner.
- Attended the scheduled course for three hours and held one office hour each week for students to discuss class topics, projects, and grading.
- Available for students promptly via email, and helped multiple students navigate complex assignments, personal situations, academic distress, and the like through scheduled meetings outside of office hours.
- Organized and updated online canvas course page, and graded all papers and exams for the course.

Research Assistant

Ann Arbor, Michigan

Yasamin Kusunoki – University of Michigan Institute for Social Research

January – August 2017

- Thematically code interviews from survivors on intimate partner violence on their experience at Planned Parenthood clinics and focus groups from Planned Parenthood clinics on their work with survivors. Cross-analyze with qualitative data on IPV within the area.
- Collaborated with multiple faculty members and graduate student researchers on approach of qualitative analysis and organization of findings to both publish current findings and inform program evaluation and staff training.
- Planned and facilitated focus groups with health care providers focused on quality standards and methods of intimate partner violence screening.
- Drafted paper for publication on provider methods of intimate partner violence screening and how they are perceived by patient survivors.

Research Assistant

Ann Arbor, Michigan

Paul Fleming – University of Michigan School of Public Health

November 2016 – May 2018

- Analyzed qualitative data through narrative writing and coding on research conducted in Kenya on adolescents regarding voluntary male circumcision and HIV/AIDS interventions.
- Wrote original analysis on masculinity and risk behavior related to coming of age to be published and contributed to design of pilot intervention in Nyanza, Kenya.
- Drafted and submitted supervisor's proposals to be published in public health journals.
- Submitted preliminary findings at annual American Men's Studies Association Conference and orally presented work at session.

Clerical Assistant

San Antonio, Texas

Trinity University

January – May 2016

- Assisted anthropology and sociology department professors with literature reviews, IRB proposals, grading and class preparation.
- Coordinated student and department meetings and aided faculty in day-to-day classroom activities as well as their preparation for tenure.
- Managed and scheduled meetings with students and assisted professors with curriculum development and grading.

Lead Researcher

Ho Chi Minh City, Vietnam

Freeman Foundation ASIANetwork Research Grant

July 2015

- Awarded \$24,995 for one month of ethnographic research for three other students, a professor and myself to research the effects of PEPFAR's defunding upon HIV/AIDS care in NGOs. Completed grant application for mixed-methods research.
- Collected original qualitative data from group (n=4) and individual (n=11) interviews of local program developers and international aid workers, along with participatory research through snowball sampling. Reported findings to grant providers in accordance with protocol.

HIV Testing and Counseling Intern

San Antonio, Texas

San Antonio AIDS Foundation – Office of Prevention

May – August 2014

- Tested and counseled over 200 foundation clients using the 60 second HIV INSTI antibody blood test while discussing sexual and general health practices. Factually and compassionately provided HIV/AIDS and STD transmission/treatment education. Filed positive syphilis and HIV results to state office. Organized all blood samples and testing materials on and off-site. Distributed harm reduction resources.

Office of Communication Intern

Washington, D.C.

Health and Human Services - Center for Medicaid & Medicare Services

June – July 2013

- Edited and wrote press releases regarding Medicaid aspects of the Affordable Care Act in accordance with Associated Press style. Aided in the response of reporter inquiries. Organized presentations and meetings of communication staff. Searched for and filtered national and international news coverage on the Affordable Care Act.

TRAINING

Human Subjects Training for Biomedical and Social/Behavioral Research

Expires July 2025

CITI Program

Certified HIV/AIDS Test Counselor and STD Facts & Fallacies

Texas Department of State Health Services

Certified in Crisis and Emergency Risk Communication Course

Centers for Disease Control and Prevention

Certified in Plain Language Training

National Institute of Health
